

# Modroc Finger Puppet Guide

CREATE YOUR VERY OWN FINGER PUPPET  
USING MODROC.

## WHAT YOU NEED

- Strips of Modroc (white bandages)
- Cup of water
- Paint
- Fine Paint Brush

## OPTIONAL

- Glue
- x2 Sequins
- Wool
- Material Scraps

## INSTRUCTIONS:

**Step 1:** Fill half a cup with water.

**Step 2:** Get your 1st strip of Modroc and dip it all the way into your cup of water for 3 seconds.

**Step 3:** Remove the wet Modroc strip from the water and wrap it around your index finger (the finger closest to your thumb) smoothing the Modroc down, until **all the holes have gone**.

**Step 4:** Now **REPEAT** this process with the other strips of Modroc, until your finger is completely covered. You can pinch the top corners of your puppet to create different features.

**Use at least 3 layers of Modroc.**

**Step 5:** Now leave to dry on your finger for about **5 minutes**.

**Step 6:** Carefully take your Puppet off your finger and leave to dry for a further **20 minutes**, until it is completely dry!

**Step 7:** Once it's all dry you can paint your puppet, using a fine paint brush.

**Step 8:** Finally to finish off you can decorate your puppet by adding wool for hair, sequins for eyes or material for clothes, using PVA glue, to bring your puppet to life.
